

**QUALITY POLICY STATEMENT.**

***Management and staff at ELG Carbon Fibre Ltd are dedicated to the principle of never-ending improvements in product quality, reliability & customer service excellence.***

Our principal aim is to always supply our customers with first-class quality products that conform exactly to stated mutually agreed specifications and standards for quality, order requirements and any other underpinning relevant statutory or regulatory requirements. At the same time, we will provide our customers with excellent customer service and technical support to ensure that our products can be seamlessly integrated into their processes.

To achieve continuity of supply we produce a Business Plan to define the business objectives for individual and specific areas. Departmental objectives enable delivery of the overall business plan and these are reviewed at regular management meetings.

The establishment of our QUENSH system is the foundation to build a company culture committed to continual improvement.

Our QUENSH system is based on the requirements of BS EN ISO 9001, BS EN 9100, IATF 16949, BS EN ISO 14001 & BS EN ISO 45001 and the company is fully committed to fulfilling these and other pertinent agreed requirements. The system has been developed to enable full integration of in-house, product, industry best practice and client specific requirements.

We are dedicated to continuous improvement, we invest in the latest machinery and cutting-edge modern technology to place us at the forefront of our industry.

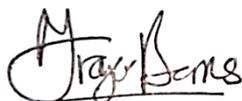

Our QUENSH system provides a risk-based approach to thinking, managing opportunities and mitigation of risks, including the elimination of product / service QUENSH defects / non-conformances or other potential QUENSH issues at the earliest stage possible. This in turn improves the overall efficiency of the organisation and supports with the achievement of the established QUENSH objectives and customer satisfaction.

Top management will demonstrate leadership and commitment through the implementation of the QUENSH system, including the formulation, monitoring and measurement of QUENSH objectives.

This policy will be communicated to all employees and when requested, stakeholders and or interested parties including sub-contractors that may be working on our behalf.

Top management will review this policy and formulate QUENSH objectives during management reviews to ensure its integrity, effectiveness and compatibility with the context and strategic direction of the organisation.
